M 14
Plates 1 1/8" x 3/4"

The M 3790, M 3720, and M 3740 Privacy Latches are same as Mortice Latches M 379, M 372, and M 374 with a hole to accept the bar of Thumb Turn Assembly M 14. A turn of the thumb piece between the edge of the door and the knob or lever handle locks the latch; another turn frees it. These privacy latches are designed for knobs and lever handles whose backplates are too small to have a thumb turn below them but can also be used with others.

Both M 14 and M 30 Thumb Turns have a safety provision for access from the other side of the door in an emergency. This feature can be left out if not required.
